Full-time Research Assistant

Professor David Chan is seeking a full-time research assistant for two years. The candidate will contribute substantially to a number of research projects in health care and productivity. The empirical research deals with large and detailed datasets to answer questions in health care productivity related to labor and organizational economics.

Qualifications

The ideal candidate will have the following qualifications:

- Strong quantitative background
- Strong programming skills
- Long-term interest in pursuing a research in economics
- Prior experience as a research assistant is also strongly desired
- Excellent academic record

Details: The position is for two years

This position requires the applicant to be at Stanford University, and authorization for work in the US is required.

TO APPLY: Please email david.c.chan@stanford.edu. A single PDF document named “[Lastname, Firstname] NBER_RA_2018” containing the following materials:

1. A cover letter describing
   a. Your interest in this position
   b. Your familiarity with programming languages (e.g. Stata, SAS, Matlab, SQL)
   c. Your prior experience as a research assistant and/or with independent research projects (e.g. a thesis or other research project)
   d. Names, e-mail addresses, and phone numbers of 2-3 references
   e. Your earliest and preferred start dates
2. A current CV, including the following information
   a. Your undergraduate degree
   b. Your undergrad institution
   c. Your undergraduate GPA
   d. The highest degree you will have obtained before your start date, and the institution
3. A transcript (unofficial is fine)
4. An original research paper (if available).

Please ask your references to send a letter of recommendation to Professor Chan at david.c.chan@stanford.edu.

Applications will be considered on a rolling basis. Short-listed applicants will be asked to complete a technical exercise and may be called for an interview. We will only be able to contact short-listed applicants.
