

Appendix Tables to accompany “The Effect of the Affordable Care Act’s Medicaid Expansion on the Unemployed,” by Buchmueller, Levy, and Valletta

November 2019

List of Tables in Appendix

- A1. Trends in insurance coverage, by employment and state Medicaid expansion status (ACS)
- A2. All coefficients (except state dummies) from DD and event study models, insurance outcomes (ACS)
- A3. Event study coefficients from model with outcome = Medicaid (ACS)
- A4. Event study coefficients from model with outcome = Uninsured (ACS)
- A5. Event study coefficients from model with outcome = Non-group coverage (ACS)
- A6. Event study coefficients from model with outcome = Employer coverage (ACS)
- A7. Trends in access to care, by employment and state Medicaid expansion status (BRFSS)
- A8. All coefficients (except state dummies) from DD and event study models, BRFSS access to care outcomes
- A9. Event study coefficients from model with outcome = Uninsured (BRFSS)
- A10. Event study coefficients from model with outcome = Delayed care (BRFSS)
- A11. Event study coefficients from model with outcome = No usual source of care (BRFSS)
- A12. Event study coefficients from model with outcome = No checkup (BRFSS)
- A13. Trends in exits from unemployment, by exit route (employment or out of labor force) and state Medicaid expansion status (CPS data)
- A14. All coefficients (except state dummies) from DD and event study models, outcomes = exits from unemployment (CPS data)
- A15. Event study coefficients by subgroup, outcomes = exits from unemployment (CPS data)

List of Figures in Appendix

- A1. Predicted unemployment exit rates (based on individual characteristics), by exit route (employment or out of labor force) and state Medicaid expansion status (CPS data).
- A2. Difference in predicted unemployment exit rates between expansion and non-expansion states, by exit route (employment or out of labor force) (CPS data).

Table A1
Trends in insurance coverage, by employment and state Medicaid expansion status
Data = American Community Survey
Adults ages 26 through 64, all states

		Employed		Unemployed	
		Non-Expansion	Expansion	Non-Expansion	Expansion
Medicaid	2008	0.022	0.037	0.103	0.174
	2009	0.032	0.049	0.125	0.177

Figure A1

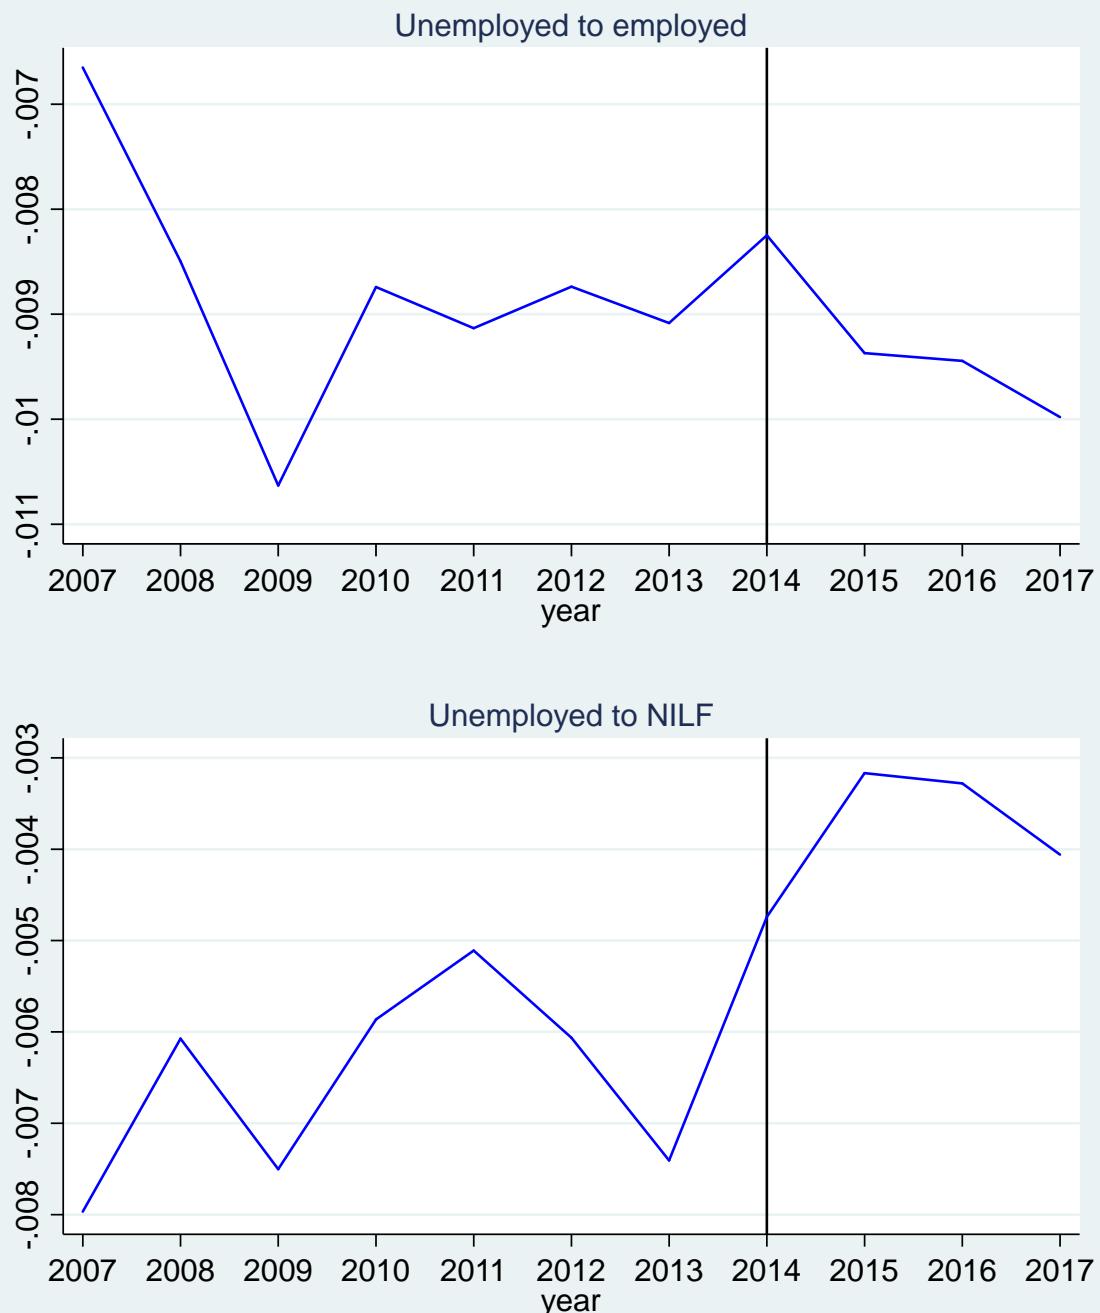

Unemployment Exit Rates (fitted)
Medicaid Expansion (2014 only) vs. Non-expansion States

Note: Estimated from monthly CPS data on unemployed individuals ages 26-64, matched across months (corrected for UNU & UEU transitions). States that expanded Medicaid after 2014 are excluded. Predictions based on fitted values using individual controls (expanded): interactions of age/education/gender/marital status (80 categories), race/ethnicity, and industry.

Figure A2

Unemployment Exit Rates (diffs in fitted values)
Medicaid Expansion (2014 only) vs. Non-expansion States

Note: Estimated from monthly CPS data on unemployed individuals ages 26-64, matched across months (corrected for UNU & UEU transitions). States that expanded Medicaid after 2014 are excluded. Predictions based on fitted values using individual controls: age, education, gender by marital status, race/ethnicity, and industry.
